Catalogue No. 16.

JULY, 1897.

The Yale & Towne Mfg. Co.

GENERAL OFFICES:

WESTERN OFFICE:

84-86 Chambers St., New York. 152-154 Wabash Ave., Chicago.

LOCAL OFFICES:

Philadelphia, Boston, Pittsburg and San Francisco.

Works:

Stamford, Conn., Branford, Conn.

ANNOUNCEMENT.

This volume embraces our products in Art Metal Work, including those contained in our earlier volumes Nos. 14 and 15, together with numerous late additions. The present volume, while illustrating our most popular ornamentations, constituting the largest line of this kind in the world, represents only a portion of our entire collection of designs and patterns for the "Hardware of Ornament." Additional designs are shown in a Photographic Album, which our salesmen will show on request, and we have patterns for many others, adapted to a great variety of special purposes.

The designs herein shown embrace almost every School of Ornament, the collection under each School being enumerated in the special index on pages vi, vii and viii. Most of the work has been executed by our own designers, or by leading architects for our exclusive use, although the collection embraces also many designs made by architects to meet their own or their clients' views in the treatment of special buildings or rooms.

The tendency to regard the Hardware of Ornament as an important element in the general scheme of decoration of a building is steadily increasing, as is also the resulting tendency to omit such hardware from general specifications, and to reserve it for selection by the architect or his client, in the same manner as other details pertaining strietly to matters of taste and decoration. Heretofore the selection of such metal work has been confined necessarily either to special designs made to order, and therefore necessarily expensive, or to limited lines of conventional design, of doubtful merit and of

such commercial character as to be objectionable to those who prefer a reasonable degree of exclusiveness in such matters. The scope of the line herein presented is so broad and varied as to meet almost every requirement of individual taste or preference and to avoid the objection of commonplaceness so justly urged against work of merely commercial character.

On pages ix and x will be found a list of the locks principally used in connection with the ornamentations herein shown; detailed descriptions and illustrations of our complete line of builders' locks will be found in our Catalogues Nos. 14 and 15.

In presenting this volume of Art products we desire to tender our sincere thanks to the large number of American architects, whose sympathy has been a constant encouragement to us in the development of this new field of decorative art, and to whose suggestions and support we are deeply indebted for much of whatever success we may have achieved.

Respectfully,

THE YALE & TOWNE MFG. CO.

EXPLANATION OF SYMBOLS FOR MET-ALS AND FINISHES.

The **Material** of which each article is made is stated in this Catalogue, and, as a rule, is not repeated in the Finish symbols associated with the list number. If necessary to indicate the kind of metal (cast or wrought) it may be done by *prefixing* a letter to the list number; the letters so used, and their significance, being as follows:

Metal (of which article is made).

METAL.	CAST.	WROUGHT.	METAL.	CAST.	WROUGHT.
Brass,	A	V	Iron	F	
Bronze,	В	W	Steel		S

Finishes.

Finishes are indicated by a symbol composed of one or more letters, sometimes combined with a number, the whole symbol always following the list number of the article. The finish symbol indicates the Coating, if any, applied to the surface of the article (such as Lacquer, Japan, or Electro-Plating), the Texture and the Color. If only one letter is used it indicates the material of which the article is made. If two letters are used, the first always indicates the material, and the second may indicate either the texture (in which case the letter used will be either V, W, X, Y or Z) or the material used in coating or plating (in which case the letters will be either A, B, C, G, N or S). If three letters are used, the first indicates the material, the second the coating or plate, and the third the texture of surface. Where a number is used it always follows the letters and indicates the color of the plate or coating, as explained in the tables below.

Platings or Coatings.

The metal used in the electro-plating, or for oxides or other chemical finishes, is indicated by the following letters:

A - Brass. G - Gold.
B - Bronze. N - Nickel.
C - Copper. S - Silver.

Lacquers and Japans, if used, are indicated by numbers from 1 to 9, as explained in the table on next page.

Texture of Surface.

This is indicated by the following letters, viz...

V - Unpolished Metal.

W - Wheel Finish, i. e., polished, not buffed.

X - Fine Grain or Sand Finish.Y - Dead smooth finish.

Z - Buffed or Highly Polished Surface.

Colors of Surfaces.

These are indicated by the numbers in the following table; the numbers under 10 being used to designate Lacquered and Japanned finishes.

3.	Japanned Matte, Imitation,	52.	Light, Oxidized.
	No. 36.	54 .	Dark, Oxidized.
5.	Lacquered with Transpar-	57.	" Center Relieved.

	Color. Surface		
36.	Matte. Ebonized. Only	V •	
37.	" Steel Gray.)		

Examples.

In illustration of the above system the following examples are given:

No. 410 is an Escutcheon Plate for door locks.

410 - BZ10 indicates that this plate is made of bronze, with buffed surface, in natural color of metal.

410 - BX10 is the same, made of bronze, in sand finish, natural color of metal.

410 - FX80 is the same plate made of iron, in sand finish, Bower-

410 - FW6 is the same plate made of cast iron, polished and Japanese Bronzed.

STANDARD FINISHES.

Under the following groups will be found the finishes most appropriate for each of the several metals and the symbols designating such finishes according to the system described on preceding pages.

A = Cast Brass.

AV10 - Unpolished.	Natural Color, dipped bright.
AW10 - Wheel Finish.	
AX10 - Sand Finish.	6.6
	"Old" Matal Light
AAZZ -	"Old" Metal, Light.
AX24 - "	" Dark.
AX57 - "	Dark, Center Relieved.
AX64 - ''	Mottled.
AX67 - "	Verde Antique.
AY10 - Dead Finish.	Natural Color.
AY22 - "	"Old" Metal, Light.
AY24 - "	" Dark.
AY57 - "	Dark, Center Relieved.
AY 64 - ''	Mottled.
*AZ10 - Buffed.	Natural Color.
AZ30 - "	Relief and Matte, Natural Color.
AZ34 - "	Relief Natural Color, Chocolate
	Matte.
AZ36 - ''	Relief Natural Color, Ebonized
	Matte.

B = Cast Bronze.

Natural Color, dipped bright.
4 6
"
"Old" Metal, Light.
Dark Bronze.
Black Bronze.
Verde Antique.
Olive Bronze, Relieved.
Pompeiian Bronze.
Natural Color.
Dark Bronze.
Statuary Bronze.
" Verde Antique.
Natural Color.
Relief and Matte, Natural Color.
Relief Natural Color, Chocolate
Matte.
Relief Natural Color, Ebonized
Matte.
Relief Natural Color, Steel Gray
Matte.

^{*}See Abbreviated Symbols, page xv.

C = Copper Plate, on Bronze Metal Only.

CW10 - Polished. Natural Color. CX10 - Sand Finish. "Old" Metal, Light. CX22 -CX24 -Dark. CX57 -Dark, Centre Relieved CX64 -Mottled. CY10 - Dead Finish. Natural Color. CY22 -"Old" Metal, Light. CY24 -Dark. CY57 -Dark, Center Relieved. CY64 -Mottled. CZ10 · Buffed. Natural Color.

F = Cast Iron.

FW5 - Polished.

FW6 - " Japanese Bronzed.

FCV10 - Unpolished.
FCW10 - Polished.
FCX22 - Sand Finsh.
FX80 - " Bower-Barffed.
FBZ3 - Buffed.
FBZ10 - Buffed.
Bronze Plated, Japanned Matte.
Bronze Plated.

S = Steel.

SV5 - Unpolished. Lacquered with Transparent Colorless Lacquer. **SV6** - Unpolished. Japanese Bronzed. *SW5 - Polished. Lacquered with Transparent Colorless Lacquer. Japanese Bronzed. **SW6** - Polished. SX80 - Sand Finish. Bower-Barffed. *SBZ3 - Buffed. Bronze Plated, Japanned Matte. *SBZ10 - Buffed. Bronze Plated. SCV10 - Unpolished. *SCX22 - Sand Finish. Copper Dip. Old Copper.

G = Gold Plate, on Bronze Metal Only.

GX10 - Sand Finish.
GY10 - Dead Finish.
GY52 - "Oxidized, Light.
GZ10 - Burnished.
Natural Color.

N = Nickel Plate, on Bronze Metal Only.

NZ10 - Buffed. Natural Color.

*See Abbreviated Symbols page xv.

S = Silver Plate, on Bronze Metal Only.

SX10 - Sand Finish.	Natural Color.
SX52 - "	Oxidized, Light.
SX54 - "	" Dark.
SX57 - "	Dark, Center Relieved,
SX64 - "	Mottled.
SY10 - Dead Finish.	Natural Color.
SY52 - "	Oxidized, Light.
SY54 - "	" Dark.
SY57 - "	Dark, Center Relieved.
SY63 - "	Butler's Silver.
SY64 - "	Mottled.
SZ10 - Buffed.	Natural Color.

Attention is especially called to the new finishes, "Verde Antique," (AX67, BX67,) "Statuary Verde Antique," (BY66,) "Pompeiian Bronze," (BX69,) and "Olive Bronze," (BX68.) These beautiful antique effects are identical with those produced by the action of the atmosphere, in certain climates, upon bronze or brass after very long exposure and are harder and more durable than any of those ordinarily used on bronze or brass.

Abbreviated Symbols.

For convenience in ordering, the symbols of a few of the more popular finishes may be abbreviated as follows; the abbreviated symbol added to the list number:

AZ10 - Buffed Brass, Natural Color,	A
BZ10 - " Bronze, "	В
FBZ3 - Bronze Plate on Iron, Japanned	
Matte,	$\mathbf{F}3$
SBZ3 - Bronze Plate on Steel, Japanned	
Matte,	S3
SW5 - Polished Steel, lacquered with	
Trsparent Colorless Lacquer,	s
SBZ10 - Bronze Plate on Steel,	sB
SCX22 - Sand Finish on Steel, Old Copper,	sc

YALE GLASS KNOBS.

The improvements herewith presented place glass knobs for the first time upon equality with metal knobs in the mechanical features of adjustment, quality and appearance, as explained below. The Yale Cut-Glass Knobs thus constitute distinctly a new product, equal in every respect to the standard of other Yale products, and are an important addition to the line of decorative hardware, especially in buildings of the better grades and in those with whose scheme of interior decoration the use of handsome glass is consistent or desirable.

ADJUSTMENT. The common pressed glass knob has no provision for adjustment, but is secured to its spindle by a rivet, inserted through a hole which must be drilled, in each case, by the carpenter. The latter rarely has facilities for such work, and knobs so applied are usually badly adjusted.

The Yale Cut-Glass Knobs have the same adjustment as the Yale Metal Knobs. This is effected by the use of our Triplex spindle, whereby the knob can be perfectly adjusted to the door and instantly secured at the proper point by means which are permanent and involve no tendency to subsequent loosening of the knob. A total adjustment of $\frac{3}{4}$ inch is obtained.

The regular knobs are adjustable to doors from $1\frac{1}{2}$ inch to $2\frac{1}{4}$ inches in thickness. If wanted for other thicknesses the order should so specify.

QUALITY. The quality of the metal work and mechanical construction is identical with that of our other Yale products. The quality of the glass used is the finest known in the trade, and every knob, whether plain or ornamental, is finished by the cutting process, thus producing exceptional symmetry and brilliancy.

A marked improvement consists in the method of attaching the glass top to the metal base by means which interlock them rigidly and securely, whereas the attachment used in common knobs is generally insecure and often unsightly. The common method involves the use of tinfoil behind the knob to conceal the metal work, thus giving a cheap appearance to the completed article; in the Yale Glass Knob this result is accomplished without the use of tinfoil and by a treatment of the rear surface of the glass which conceals the metal work and increases the attractive appearance of the knob.

APPEARANCE. The qualities already stated conduce to unequalled beauty and style in the appearance of the completed knobs. The line comprises both Plain and Ornamental knobs and is based upon three original types, as follows:

No G56, a plain round knob of flat form;

No. G66, a plain octagon knob:

No. G86, a plain spherical or ball knob.

Each of these types is reproduced in various ornamental cuttings, varying from a simple fluting to the most elaborate design. Other special designs including engraved monograms or crests, are furnished to order.

Roses and Key Plates. The regular trim associated with the Yale Cut-Glass Knobs is a rose and key plate on each side of the door. The rose may be either plain or beaded. The Regular key plates correspond with the roses, or Special key plates, as illustrated on pages 201 and 202, may be substituted, if desired.

Escutcheon plates, either plain or ornamental, and in any metal or finish, may be combined with glass knobs in place of the regular rose and key plate, this combinination being novel and very attractive. (See page 200.)
